DURACOLOR GROUT

Merkrete DURACOLOR Grout is a professional-grade, polymer-modified Portland cement grout specifically formulated for grouting all types of ceramic and dimensional stone tiles. Duracolor sanded grout fills joint widths $\frac{1}{8}$ " to $\frac{1}{2}$ " while non-sanded grout is used for joints $\frac{1}{16}$ " to $\frac{1}{8}$ ". Duracolor is suitable for walls and floors in residential and commercial projects.

USES

- Sanded for joint widths $\frac{1}{8}$ " to $\frac{1}{2}$ " (3.2 mm to 13 mm)
- Non-sanded for joint widths $\frac{1}{16}$ " to $\frac{1}{2}$ " (1.6 mm to 3.2 mm)
- Use on both vertical (wall) and horizontal (floor) applications
- Residential and commercial projects both interior and exterior

STANDARDS:

- Exceeds ANSI A118.6
