GROUT

COLOR SELECTION

Tile size, style, color, composition and areas of use constantly evolve. So must the tile installation products. Using the correct installation products is vital to the success of every tile project and selecting the right grout is just as important.

Sample colors shown are approximate to the final grout color. Final installed grout color may vary due to job conditions, tile porosity, mixing ratio, sealers, installation methods, temperature, or individual batches. Use grouts with the same batch number whenever possible. Different batch numbers should be dry blended together to obtain color uniformity. Follow ANSI A108.10 grouting practices.
